Summary

Innovative Software Developer with extensive experience in developing and testing applications using agile methodologies and coding languages. Committed to delivering creative solutions that align with business goals and requirements.

Education

Dr. APJ Abdul Kalam Technical University **June 2020 - June 2024**
Civil Engineering Bachelor of Technology

Experience

Shreeva Soft-Tech Innovations **October 2023 - Present**
Full Stack Developer Prayagraj, UP
🔗 <https://shreeva.in>

- Developed an integrated ecosystem for diverse company initiatives involving logistics, fintech, booking & billing systems on shared database models, collaborating closely with cross-functional teams, achieving a remarkable 120% increase in productivity.
- Worked on Agile and Scrum projects utilizing Jira, Confluence, Figma, and Notion tools to enhance development efficiency by 80%.
- Learned AngularJS, AWS, Go Lang, and other cross-platform frameworks like Ionic using Capacitor, as well as architectures like MVC and service model.

Uttar Pradesh Housing & Development Board **August 2023 - September 2023**
Database Engineer Intern Lucknow, UP
🔗 <https://upavp.in>

- Automated the database performance optimization tasks, resulting in exponential growth of the response time to queries by 35%.
- Increased scalability and flexibility of data with advanced data modeling techniques for structured and unstructured data, with an increase of 25% in data security.
- Collaborated on projects for the Govt of Uttar Pradesh, creating high-performance applications using the custom data warehouse.

Pixel Business **March 2022 - May 2022**
UI/UX Developer Intern Remote, IN
🔗 <https://pixelbusiness.in>

- Created responsive and interactive user interfaces, increasing the number of new users and reducing the reload time on each page by 40%.
- Processed high-demand User Experience with design elements, which accelerated user satisfaction rates from 42% to 67%.
- Developed interactive user interfaces using React.js, HTML, CSS, JavaScript, and SCSS that enabled cross-platform compatibility.

Projects

RaagBeats **August 2023**
🔗 [RaagBeats](#)

- Created a web API architecture to fetch data from Spotify and Curated the in-built computer systems architecture to facilitate music streaming by 40%.
- Designed the UI/UX of a music web player to increase user impression by 180%.
- Built the architecture using Vite + React implementing data visualizing and design front for better UI/UX.

Native API's, React js, SCSS, Tailwind CSS, React Hooks, React Redux
